

AL-2 VLAKFILTERS

Filters with metal frame provided with flat filter cloth

CHARACTERISTICS

AL-2 flat filters are square or rectangular filters, consisting of a metal profile that is provided with an open metal mesh at the front and rear, between which a synthetic filter mat or PPI filter material is placed.

The filter class depends on the filter material used. AL-2 flat filters are supplied as standard with a thickness of 22mm, but different thicknesses are possible on request. The filters are supplied in every common standard external size. Different sizes are available on request.
