

Phiferglass Standard Insect Screen

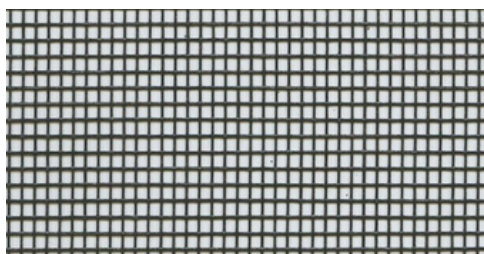

Phiferglass Standard Insect Screen is our traditional fiberglass insect screen for windows and doors. For a more durable fiberglass insect screen, choose the standard mesh insect screen. The mesh is woven from strong glass yarn and coated with a durable vinyl layer. As a result, the mesh is flexible, colorfast, and resistant to rust, stains, and corrosion. Even after years of use and exposure to sunlight and weather conditions, the mesh remains in top condition. Phiferglass® has also been tested for 1200 hours of accelerated UV aging, highlighting its excellent weather resistance.

Specifications
