

TuffScreen

TuffScreen is a heavy-duty, vinyl-coated polyester insect screen built for maximum strength and long-term durability. Stronger than traditional screening, it is designed to resist tears, punctures, and pet damage, making it ideal for high-traffic areas.

With widths available up to 335 cm, TuffScreen is perfect for large enclosures, including expansive openings and screened patios. Whether used for windows, doors, or outdoor structures, it delivers reliable insect protection without compromising visibility or airflow, making it a robust solution for homes that demand more from their screens.
