

Flevida Retractable Flydoor

Flevida insect screen doors represent a true breakthrough in roller screens. This system combines the advantages of a traditional roller screen door with the strong features of a pleated system, such as a fully flat bottom rail, a stable caterpillar track, and a practical clip mounting system.

The mesh is thin, water-repellent, UV-resistant, and exceptionally strong. This ensures optimal outward visibility and maximum ventilation. Thanks to the adjustable spring tension, the mesh retracts in a controlled and smooth manner, providing added ease of use.

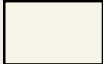

Installation is quick and straightforward, even in non-square openings. The door remains neatly aligned and performs reliably in everyday use. Flevida is available in both single and double configurations.

Specifications

Single door (max. W x H)	1800 × 3200 mm
Double door (max. W x H)	3600 × 3200 mm
Optional	Frame for face mount
MOQ	1 piece
Installation	Easy with or without screws Top & bottom profile needs to be cut to size
	<i>*Sawing (cutting to size) can, if desired, be carried out by Ultimesh.</i>

Standard colours

		
RAL9001	RAL9010	RAL9016
		
RAL9005	RAL7016	

**Custom RAL colour upon on request*
